Agro met Advisory Service bulletin No.28-for the Rajkot district

(Issued jointly by DFRS, J.A.U., Targhadia (Rajkot) and India Meteorological Department)

(Period 06 to 10-July - 2019)

Significant past weather for the preceding week of Rajkot

Rainfall (mm)	4.0
Maximum temperature (°C)	35.8-37.3
Minimum temperature (°C)	23.4-26.1
Relative Humidity (%) I	80-87
Relative Humidity (%) II	47-57
Wind speed (Kmph)	6.3-9.2

Weather forecast until 08-30 hrs.of 10/07/2019

(1) RAJKOT DISTRICT:

	06/07/19	07/07/19	08/07/19	09/07/19	10/07/19
Rainfall (mm)	0	8	3	0	0
Max.Temp.(°C)	35	35	36	36	35
Min.Temp.(°C)	24	25	25	25	25
Total CC (octa)	8	7	7	7	8
RH-I (%)	75	74	75	74	72
RH-II (%)	62	59	56	50	55
Wind Speed (kmph)	20	23	22	28	32
Wind Direction(deg.)	247	244	238	239	244

Agro meteorological Advisories:

General Advice	<ul style="list-style-type: none">• Rain fall: hot, humid and generally cloudy to cloudy weather forecasted for next five days. During 07 to 08-July light rainfall forecasted.• Temperature: Maximum and minimum temperature likely to be in range of 35-36°C and 24-25°C, respectively.• Relative Humidity: The RH-I and RH-II is likely to be in the range of 72-75% & 50-62, respectively.• Wind Direction and Speed: Direction and speed of wind is likely to be SW and 20-32 km/h, respectively.• Complete sowing of kharif crops in time where sufficient rainfall received.• Carry out Planking or harrowing after sowing to conserve moisture for better
-----------------------	--

	<p>germination, where sowing is over.</p> <ul style="list-style-type: none"> • Due to sporadic and isolated rainfall in Rajkot, Amreli, Jamnagar and Surendranagar districts sowing, gap filling and thinning operations are going on simultaneously. • Make provision to drain excess water from field, harvest and store it in reservoir. 		
Crops	Stage	Insect/Pest/ Variety	Advisory
Kharif groundnut	Germination/ sowing	Semi spreading, GG-20, GG-22 Bunch, GG- 2,GJG-31, GJG- 32, GG-5, TAG-24, TG-37 A, TPG-41, TLG-45,	Carry out sowing in time where sufficient rainfall received. Apply 156 kg/ha SSP, 62 kg/ha Ammonium sulphate and 500 kg/ha Castor cake as basal dose. Seed treatment with Dithane M-45/Captan/vitavax @ 2 grams per kg of seeds before sowing is advised. As preventive measure for white grub infestation in groundnut crop treat the seed with Chlorpyrifos 20 % EC OR Quinalfos 25 % EC @ 25 ml/kg seed at the time of sowing.
Cotton	Germination/ sowing	Early: Bg-II GCH-8, GTHH-49, ATM, Jay, First Class, 7576, V-333, Neo, Beejdhan-2, Sarju, Atom, Bhakti,Bhadra Medium Late: Bg-II GCH-6, RCH-659, Agritop-777, Agritop-444, Solar-76, Swapna, Mallika, Ajit-155	Procure good quality of seeds for kharif . Carry out sowing in time where sufficient rainfall received. Farmers are kindly advised to sow non-BT cotton seeds (Refuse) given with cotton BT-II seeds to prevent resistance in ball worms against BT-II technology. Apply 20 kg nitrogen/ha as basal for rainfed cotton. Adopt inter crop like sesame, groundnut, soybean, pulses and maize in cotton crop for risk management.
Sesame	Germination/ sowing	GT-2 or GT-3 variety.	Procure good quality of seeds for kharif sowing&Carry out sowing in time where sufficient rainfall received.
Pearl millet	Germination/ sowing	GHB-558,577,538,719, 732,744	Procure good quality of seeds for kharif sowing&Carry out sowing in time where sufficient rainfall received.
Pulses	Germination/ sowing	Farmers growing pulses are advised to select variety GM-4, K-851 & GAM-5for green gram, Guj. Adud-1 for black gram, Gujarat cowpea-1,2,4, PusaFalguni for cowpea , BDN-2, GT-100, GTH-1 for pigeon pea	

		and Procure good quality of seeds for kharif sowing&Carry out sowing in time where sufficient rainfall received.	
Vegetables	Nursery /Transplanting	Farmers are advised for preparation of nursery for tomato, chilli, brinjal and early cauliflower (maturing in the month of September). It is also advised to use shed nets, which helps in reducing vector borne diseases and produce healthy seedlings. Nursery should be covered by net at the height of 6.5 feet for protection against sunlight. Transplanting of brinjal, chilli and early cauliflower are advised for those farmers whose seedlings are ready.	
	Sowing	Farmers are advised for sowing of Cucurbits in rainy season. It is most suitable time to sow recommended hybrids/ varieties. Some popular hybrids are Bottle Gourd-Junagadh long tender , Pusa Naveen, PusaSamridhi Bitter Gourd- PusaVisesh, Pusa-2 mosumi, Pumpkin-PusaVisvash , PusaVikash Ridge Gourd-G.J.H-1 , PusaChikni etc. Faremrs are also advised for Sowing of ladyfinger, cluster bean, kidney bean, cowpea, tur, amranthus etc.	
Lady finger	Flowering/ fruiting	White flies & mites	Spray 500 ml of 5 % neem seed extract orneem seed oil 50 ml with withacetamiprid 20 % SP@ 5.0 gm or imidacloprid 30.5 SC 3 ml/10 lit of water for whiteflies control. Constant monitoring of lady finger crop against attack of mite is advised. If population is found more, then spraying of Ethion @ 1.5-2 ml/litre of water is advised when sky remains clear. Due to prevailing high temperature, light irrigation at short interval is advised. After harvesting of mature okra application of urea @ 5-10 kg/ acre should be done.
Ridge gourd, Bottle gourd, Sponge guard, Bitter guard& cucurbitaceous crops	Flowering & fruiting	Thrips& white flies/ Mites Downy mildew	Optimum moisture level should be maintained in cucurbitaceous crops by light and frequent irrigation as dry conditions may lead to poor pollination and thus drop in yield of the crop. In all vegetable crops thrips infestation observed above ETL. Spray 500 ml of 5 % neem seed extract orneem seed oil 50 ml withacetamiprid 20 % SP@ 5.0 gm or imidacloprid 30.5 SC 3 ml/10 lit of water for whiteflies control. If population is found more, then spraying of Ethion @ 1.5-2 ml/litre of water for the control of Mites. For the control of downy mildew spray mencozeb 40g/pump.
Cluster bean	Growing/fruiting	Thrips, white fly	To control them spray neem seed extract 500 ml or neem seed oil 50 or neem oil 40 ml and acetamiprid 20 % SP@ 5.0 gm / 10 lit of water at 15 days interval

Brinjal& Tomato	Flowering/ fruiting	Sucking pest → & Fruit borer 	<p>To control sucking pest spray neem seed extract 5 % or neem seed oil 50 ml and To control them spray acetamiprid 20 % SP@ 5.0 gm / 10 lit of water.</p> <p>In brinjal and tomato constant monitoring of borers by using pheromone traps 4-6 per acre is advised, If insect population is above ETL than spraying of Spinosad 3.0 ml/10 litre of water is advised against fruit borer.</p>
Chili	Flowering/ fruiting	Thrips →  Leaf curling Virus→  Mites	<p>In present weather conditions attack of mites has been reported.To control mite infestation spray propargite 57 % EC 10 ml/10 litre of water.In present weather conditions, rouging of viral infested crop should be done in chilli. Infected plants should be uprooted and buried in the soil. After rouging, spraying of Imidacloprid @ 5 ml per 10litre of water is advisedfor control the vector, when sky remains clear.</p> <p>Constant monitoring of the chilli crop against attack of mites is advised If population is found more, then spraying of Ethion @ 1.5-2 ml/litre of water</p>
Lemon	Fruit development	Mite  Psylla and thrips  Citrus canker Leaf minor	<p>Due to high temperature mites infestation in lemon orchard observed. To control mite infestation spray propargite 57 % EC 10/10 liter of water.</p> <p>To prevent damage of psylla&thrips spray imidacloprid 30.5 % 5 ml / 10 lit of water ml/10 lit of water.</p> <p>Spray copper oxychloride 40 gm or streptocyclie 1.5 gm in 10 litre of water</p> <p>Spray Dichlorvosh 10 ml or Quinalphos 20 ml in 10 litres of water for control of leafminor.</p>
Livestock & poultry 	<p>Spray Deltamethrin or Amitraz 2 ml/litre of water for the control of tick. Deworming, T.B. and J.D. Testing should be done. Provide 6-8 kg good quality dry roughage with 15-20 kg green fodder to the animals. For milch animals, regularly follow schedule of 1 kg feed + 50 g mineral mixture per 2 liters of milk yield. Feed animals with a mixture of green grass + hay + minerals + dry feed. Ensure regarding vaccination of animals for different diseases in rainy season. Spray phenyl in the animal shed to avoid fly's and mosquitoes.</p> <p>Due to chance of rainfall at isolated places keep animals indoors during rainfall. Keep fodder in safe place to avoid spoilage due to rainfall.</p>

Agro meteorological Advisories:-

General Advice

- **Rain fall:** hot, humid and generally cloudy to cloudy weather forecasted for next five days. During 07 and 09-July light rainfall forecasted.
- **Temperature:** Maximum and minimum temperature likely to be in range of 33-33°C and 27-27°C, respectively.
- **Relative Humidity:** The RH-I and RH-II is likely to be in the range of 77-79% & 66-71, respectively.
- **Wind Direction and Speed:** Direction and speed of wind is likely to be SW and 26-37 km/h, respectively.
- **Complete sowing of kharif crops in time where sufficient rainfall received.**
- **Carry out Planking or harrowing after sowing to conserve moisture for better germination, where sowing is over.**
- **Make provision to drain excess water from field, harvest and store it in reservoir.**
- **Farmer are also advised to adopt cotton-sesame, cotton-groundnut and cotton-**

maize inter cropping system as risk management.			
Crops	Stage	Insect/Pest/ Variety	Advisory
Kharif groundnut	Germination/On set of monsoon	Semi spreading, GG-20, GG-22 Bunch, GG- 2,GJG-31, GJG- 32, GG-5, TAG-24, TG-37 A, TPG-41, TLG-45,	Carry out sowing in time where sufficient rainfall received. Apply 156 kg/ha SSP, 62 kg/ha Ammonium sulphate and 500 kg/ha Castor cake as basal dose. Seed treatment with Dithane M-45/Captan/vitavax @ 2 grams per kg of seeds before sowing is advised. As preventive measure for white grub infestation in groundnut crop treat the seed with Chlorpyrifos 20 % EC OR Quinalfos 25 % EC @ 25 ml/kg seed at the time of sowing.
Cotton	Germination/ sowing	Early: Bg-II GCH- 8, GTHH-49, ATM, Jay, First Class, 7576, V- 333, Neo, Beejdhan-2, Sarju, Atom, Bhakti,Bhadra Medium Late: Bg- II GCH-6, RCH- 659, Agritop-777, Agritop-444, Solar-76, Swapna, Mallika, Ajit-155	Procure good quality of seeds for kharif . Carry out sowing in time where sufficient rainfall received. Farmers are kindly advised to sow non-BT cotton seeds (Refuse) given with cotton BT-II seeds to prevent resistance in ball worms against BT-II technology. Apply 20 kg nitrogen/ha as basal for rainfed cotton. Adopt inter crop like sesame, groundnut, soybean, pulses and maize in cotton crop for risk management.
Sesame	Germination/ sowing	GT-2 or GT-3 variety.	Procure good quality of seeds for kharif sowing&Carry out sowing in time where sufficient rainfall received.
Pearl millet	Germination/ sowing	GHB- 558,577,538,719, 732,744	Procure good quality of seeds for kharif sowing&Carry out sowing in time where sufficient rainfall received.
Pulses	Germination/ sowing	Farmers growing pulses are advised to select variety GM-4, K-851 & GAM-5for green gram, Guj. Adud-1 for black gram, Gujarat cowpea- 1,2,4, PusaFalguni for cowpea , BDN-2, GT-100, GTH-1 for pigeon pea and Procure good quality of seeds for kharif sowing&Carry out sowing in time where sufficient rainfall received.	

Vegetables	Nursery /Transplanting	Farmers are advised for preparation of nursery for tomato, chilli, brinjal and early cauliflower (maturing in the month of September). It is also advised to use shed nets, which helps in reducing vector borne diseases and produce healthy seedlings. Nursery should be covered by net at the height of 6.5 feet for protection against sunlight. Transplanting of brinjal, chilli and early cauliflower are advised for those farmers whose seedlings are ready.	
	Sowing	Farmers are advised for sowing of Cucurbits in rainy season. It is most suitable time to sow recommended hybrids/ varieties. Some popular hybrids are Bottle Gourd-Junagadh long tender , Pusa Naveen, PusaSamridhi Bitter Gourd- PusaVisesh, Pusa-2 mosumi, Pumpkin-PusaVisvash , PusaVikash Ridge Gourd-G.J.H-1 , PusaChikni etc. Farmers are also advised for Sowing of ladyfinger, cluster bean, kidney bean, cowpea, tur, amranthus.	
Lady finger	Flowering/ fruiting	White flies & mites	Spray 500 ml of 5 % neem seed extract or neem seed oil 50 ml with with acetamiprid 20 % SP@ 5.0 gm or imidacloprid 30.5 SC 3 ml/10 lit of water for whiteflies control. Constant monitoring of lady finger crop against attack of mite is advised. If population is found more, then spraying of Ethion @ 1.5-2 ml/litre of water is advised when sky remains clear. Due to prevailing high temperature, light irrigation at short interval is advised. After harvesting of mature okra application of urea @ 5-10 kg/ acre should be done.
Ridge gourd, Bottle gourd, Sponge guard, Bitter guard & cucurbitaceous crops	Flowering & fruiting	Thrips & white flies/ Mites Downy mildew	Optimum moisture level should be maintained in cucurbitaceous crops by light and frequent irrigation as dry conditions may lead to poor pollination and thus drop in yield of the crop. In all vegetable crops thrips infestation observed above ETL. Spray 500 ml of 5 % neem seed extract or neem seed oil 50 ml with acetamiprid 20 % SP@ 5.0 gm or imidacloprid 30.5 SC 3 ml/10 lit of water for whiteflies control. If population is found more, then spraying of Ethion @ 1.5-2 ml/litre of water for the control of Mites. For the control of downy mildew spray mencozeb 40g/pump.
Cluster bean	Growing/fruiting	Thrips, white fly	To control them spray neem seed extract 500 ml or neem seed oil 50 or neem oil 40 ml and acetamiprid 20 % SP@ 5.0 gm / 10 lit of water at 15 days interval

Brinjal& Tomato	Flowering/ fruiting	Sucking pest → & Fruit borer 	<p>To control sucking pest spray neem seed extract 5 % or neem seed oil 50 ml and To control them spray acetamiprid 20 % SP@ 5.0 gm / 10 lit of water.</p> <p>In brinjal and tomato constant monitoring of borers by using pheromone traps 4-6 per acre is advised, If insect population is above ETL than spraying of Spinosad 3.0 ml/10 litre of water is advised against fruit borer.</p>
Chili	Flowering/ fruiting	Thrips →  Leaf curling Virus →  Mites	<p>In present weather conditions attack of mites has been reported. To control mite infestation spray propargite 57 % EC 10 ml/10 litre of water. In present weather conditions, rouging of viral infested crop should be done in chilli. Infected plants should be uprooted and buried in the soil. After rouging, spraying of Imidacloprid @ 5 ml per 10litre of water is advised for control the vector, when sky remains clear.</p> <p>Constant monitoring of the chilli crop against attack of mites is advised If population is found more, then spraying of Ethion @ 1.5-2 ml/litre of water</p>
Lemon	Fruit development	Mite  Psylla and thrips  Citrus canker Leaf minor	<p>Due to high temperature mites infestation in lemon orchard observed. To control mite infestation spray propargite 57 % EC 10/10 liter of water.</p> <p>To prevent damage of psylla&thrips spray imidacloprid 30.5 % 5 ml / 10 lit of water ml/10 lit of water.</p> <p>Spray copper oxychloride 40 gm or streptocyclie 1.5 gm in 10 litre of water</p> <p>Spray Dichlorvosh 10 ml or Quinalphos 20 ml in 10 litres of water for control of leafminor.</p>
Livestock & poultry 	<p>Spray Deltamethrin or Amitraz 2 ml/litre of water for the control of tick. Deworming, T.B. and J.D. Testing should be done. Provide 6-8 kg good quality dry roughage with 15-20 kg green fodder to the animals. Due to chance of rainfall at isolated places keep animals indoors during rainfall. Keep fodder in safe place to avoid spoilage due to rainfall. Ensure regarding vaccination of animals for different diseases in rainy season. Spray phenyl in the animal shed to avoid fly's and mosquitoes. Due to chance of light rainfall at isolated places keep animals indoors during rainfall. Keep fodder in safe place to avoid spoilage due to rainfall.</p>

Agro met Advisory Service bulletin No.-28 for the Devbhumi Dwarka district

(Issued jointly by DFRS, J.A.U., Targhadia (Rajkot) and India Meteorological Department)

(Period 06 to 10-July - 2019)

Weather forecast until 08-30 hrs of 10/07/2019

(4) DEVBHUMI DWARKA DISTRICT:

	06/07/19	07/07/19	08/07/19	09/07/19	10/07/19
Rainfall (mm)	0	3	3	0	0
Max. Temp.(°C)	32	31	30	31	31
Min. Temp.(°C)	31	29	29	29	29
Total CC (octa)	7	8	6	7	8
RH-I (%)	77	78	79	79	78
RH-II (%)	62	63	70	67	68
Wind Speed (kmph)	28	27	26	30	36
Wind Direction(deg.)	242	242	236	241	244

Agro meteorological Advisories:-

General Advice	<ul style="list-style-type: none">• Rain fall: hot, humid and generally cloudy to cloudy weather forecasted for next five days. During 07 and 08-July light rainfall forecasted.• Temperature: Maximum and minimum temperature likely to be in range of 30-32°C and 29-31°C, respectively.• Relative Humidity: The RH-I and RH-II is likely to be in the range of 77-79% & 62-70, respectively.• Wind Direction and Speed: Direction and speed of wind is likely to be SW and 26-36 km/h, respectively.
-----------------------	--

	<ul style="list-style-type: none"> • Complete sowing of kharif crops in time where sufficient rainfall received. • Carry out Planking or harrowing after sowing to conserve moisture for better germination, where sowing is over. • Make provision to drain excess water from field, harvest and store it in reservoir. • Farmer are also advised to adopt cotton-sesame, cotton-groundnut and cotton-maize inter cropping system as risk management. 		
Crops	Stage	Insect/Pest/ Variety	Advisory
Kharif groundnut	Germination/On set of monsoon	Semi spreading, GG-20, GG-22 Bunch, GG-2, GJG-31, GJG-32, GG-5, TAG-24, TG-37 A, TPG-41, TLG-45,	Carry out sowing in time where sufficient rainfall received. Crops	Stage	Insect/Pest/ Variety	Advisory
Kharif groundnut	Germination/On set of monsoon	Semi spreading, GG-20, GG-22 Bunch, GG-2, GJG-31, GJG-32, GG-5, TAG-24, TG-37 A, TPG-41, TLG-45,	Carry out sowing in time where sufficient rainfall received. Apply 156 kg/ha SSP, 62 kg/ha Ammonium sulphate and 500 kg/ha Castor cake as basal dose. Seed treatment with Dithane M-45/Captan/vitavax @ 2 grams per kg of seeds before sowing is advised. As preventive measure for white grub infestation in groundnut crop treat the seed with Chlorpyrifos 20 % EC OR Quinalfos 25 % EC @ 25 ml/kg seed at the time of sowing.
Cotton	Germination/sowing	Early: Bg-II GCH-8, GTHH-49, ATM, Jay, First Class, 7576, V-333, Neo, Beejdhan-2, Sarju, Atom, Bhakti, Bhadra Medium Late: Bg-II GCH-6, RCH-659, Agritop-777, Agritop-444, Solar-76, Swapna, Mallika, Ajit-155	Procure good quality of seeds for kharif . Carry out sowing in time where sufficient rainfall received. Farmers are kindly advised to sow non-BT cotton seeds (Refuse) given with cotton BT-II seeds to prevent resistance in ball worms against BT-II technology. Apply 20 kg nitrogen/ha as basal for rainfed cotton. Adopt inter crop like sesame, groundnut, soybean, pulses and maize in cotton crop for risk management.
Sesame	Germination/sowing	GT-2 or GT-3 variety.	Procure good quality of seeds for kharif sowing&Carry out sowing in time where sufficient rainfall received.
Pearl millet	Germination/sowing	GHB-558,577,538,719,	Procure good quality of seeds for kharif sowing&Carry out sowing in time where

		732,744	sufficient rainfall received.
Pulses	Germination/ sowing	Farmers growing pulses are advised to select variety GM-4, K-851 & GAM-5 for green gram, Guj. Adud-1 for black gram, Gujarat cowpea-1,2,4, PusaFalguni for cowpea, BDN-2, GT-100, GTH-1 for pigeon pea and Procure good quality of seeds for kharif sowing & Carry out sowing in time where sufficient rainfall received.	
Vegetables	Nursery /Transplanting	Farmers are advised for preparation of nursery for tomato, chilli, brinjal and early cauliflower (maturing in the month of September). It is also advised to use shed nets, which helps in reducing vector borne diseases and produce healthy seedlings. Nursery should be covered by net at the height of 6.5 feet for protection against sunlight. Transplanting of brinjal, chilli and early cauliflower are advised for those farmers whose seedlings are ready.	
	Sowing	Farmers are advised for sowing of Cucurbits in rainy season. It is most suitable time to sow recommended hybrids/ varieties. Some popular hybrids are Bottle Gourd-Junagadh long tender , Pusa Naveen, PusaSamridhi Bitter Gourd- PusaVisesh, Pusa-2 mosumi, Pumpkin- PusaVisvash, PusaVikash Ridge Gourd-G.J.H-1 , PusaChikni etc. Farmers are also advised for Sowing of ladyfinger, cluster bean, kidney bean, cowpea, tur, amaranthus.	
Lady finger	Flowering/ fruiting	White flies & mites	Spray 500 ml of 5 % neem seed extract or neem seed oil 50 ml with with acetamiprid 20 % SP @ 5.0 gm or imidacloprid 30.5 SC 3 ml/10 lit of water for whiteflies control. Constant monitoring of lady finger crop against attack of mite is advised. If population is found more, then spraying of Ethion @ 1.5-2 ml/litre of water is advised when sky remains clear. Due to prevailing high temperature, light irrigation at short interval is advised. After harvesting of mature okra application of urea @ 5-10 kg/ acre should be done.

Ridge gourd, Bottle gourd, Sponge guard, Bitter guard & cucurbitaceous crops	Flowering & fruiting	Thrips & white flies/ Mites Downy mildew	<p>Optimum moisture level should be maintained in cucurbitaceous crops by light and frequent irrigation as dry conditions may lead to poor pollination and thus drop in yield of the crop.</p> <p>In all vegetable crops thrips infestation observed above ETL. Spray 500 ml of 5 % neem seed extract or neem seed oil 50 ml with acetamiprid 20 % SP @ 5.0 gm or imidacloprid 30.5 SC 3 ml/10 lit of water for whiteflies control.</p> <p>If population is found more, then spraying of Ethion @ 1.5-2 ml/litre of water for the control of Mites.</p> <p>For the control of downy mildew spray mencozeb 40g/pump.</p>
Cluster bean	Growing/fruiting	Thrips, white fly	To control them spray neem seed extract 500 ml or neem seed oil 50 or neem oil 40 ml and acetamiprid 20 % SP @ 5.0 gm / 10 lit of water at 15 days interval
Brinjal & Tomato	Flowering/fruiting	Sucking pest → & Fruit borer 	<p>To control sucking pest spray neem seed extract 5 % or neem seed oil 50 ml and To control them spray acetamiprid 20 % SP @ 5.0 gm / 10 lit of water.</p> <p>In brinjal and tomato constant monitoring of borers by using pheromone traps 4-6 per acre is advised, If insect population is above ETL than spraying of Spinosad 3.0 ml/10 litre of water is advised against fruit borer.</p>
Chili	Flowering/fruiting	Thrips →  Leaf curling Virus →  Mites	<p>In present weather conditions attack of mites has been reported. To control mite infestation spray propargite 57 % EC 10 ml/10 litre of water. In present weather conditions, rouging of viral infested crop should be done in chilli. Infected plants should be uprooted and buried in the soil. After rouging, spraying of Imidacloprid @ 5 ml per 10 litre of water is advised for control the vector, when sky remains clear.</p> <p>Constant monitoring of the chilli crop against attack of mites is advised. If population is found more, then spraying of Ethion @ 1.5-2 ml/litre of water</p>
Lemon	Fruit development	Mite  Psylla and thrips	<p>Due to high temperature mites infestation in lemon orchard observed. To control mite infestation spray propargite 57 % EC 10/10 liter of water.</p>  <p>To prevent damage of psylla & thrips spray</p>

		Citrus canker Leaf minor	imidacloprid 30.5 % 5 ml / 10 lit of water ml/10 lit of water. Spray copper oxychloride 40 gm or streptocyclie 1.5 gm in 10 litre of water Spray Dichlorvosh 10 ml or Quinalphos 20 ml in 10 litres of water for control of leafminor.
Livestock & poultry 	<p>Spray Deltamethrin or Amitraz 2 ml/litre of water for the control of tick. Deworming, T.B. and J.D. Testing should be done. Provide 6-8 kg good quality dry roughage with 15-20 kg green fodder to the animals. Due to chance of rainfall at isolated places keep animals indoors during rainfall. Keep fodder in safe place to avoid spoilage due to rainfall. Ensure regarding vaccination of animals for different diseases in rainy season. Spray phenyl in the animal shed to avoid fly's and mosquitoes. Due to chance of light rainfall at isolated places keep animals indoors during rainfall. Keep fodder in safe place to avoid spoilage due to rainfall.</p>
